

Secure Digital Cards

Great for Storing Pictures, Music and Data

Similar in size to MultiMediaCards, Lexar Media Secure Digital (SD) Cards are designed for use in many digital devices including digital cameras, MP3 players, PDAs, cellular phones and camcorders.

The Lexar Media SD Cards have an erasure-prevention switch to keep your data safe. When the switch is in the locked position, it will stop you from accidentally copying over or deleting data stored on your card. Now you know your data will be safe.

Reliability and durability are critical to ensure your data is there when you need it. All Lexar Media SD Cards are tested and manufactured to the highest quality standard to assure you there is no need to worry about lost or missing data. With the small size and solid-state design of the SD Cards, they are perfect for mobile applications and users.

5-year Limited Warranty

This product is backed by a 5-year limited customer-satisfaction warranty.

Take Better Pictures with Lexar Digital Film

Approximate Number of Images per Capacity									
Camera Type:	File Size**	32MB **	64MB	128MB	256MB	512MB	1GB*	2GB	4GB
2 Megapixel Camera:	900KB	35	71	142	284	568	1137	2275	4551
3 Megapixel Camera:	1,2MB	26	53	106	213	426	853	1706	3413
4 Megapixel Camera:	2MB	16	32	64	128	256	512	1024	2048
5 Megapixel Camera:	2.5MB	12	25	51	102	204	409	819	1638
6 Megapixel Camera:	3.2MB	10	20	40	80	160	320	640	1280

* Average file size using camera's "high-resolution" JPEG mode. The actual number of images per card will vary and depends on the camera model and complexity of the scene being photographed.

** MB = megabytes, GB = gigabytes
